Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	N/A
5	Environment configuration file (.env.example or similar)	N/A
6	Deployed application URL (if hosted)	No
7	APK / Executable binary (if applicable for mobile/desktop apps)	N/A
8	Dockerfile / Containerization config (if applicable)	N/A
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

HDI-Predictor/

```

|
|— app.py
|— model.py
|— hdi.csv
|— model.pkl
|— requirements.txt
|— README.md
|
|— templates/
|   |— index.html
|   |— result.html
|   |— analysis.html
|   |— about.html
|— static/
|   |— style.css
|   |— images/
|       |— heatmap.png
|       |— scatter.png
|       |— distribution.png
|       |— pairplot.png
|       |— stripplot.png
|— generate_graphs.py
  
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Local Flask Server (http://127.0.0.1:5000)
Login Credentials (Demo)	Not Required (Public Access)
Platform / Hosting Provider	Flask Development Server (Local)
Repository Link	https://github.com/Ishwaryaketha/HDI-Predictor
Demo Video Link	https://drive.google.com/file/d/1AqT1aV_k7Ouh8L2pbc9K-MMxOVePgOJ3/view?usp=drivesdk

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

- Clone the repository:

```
git clone https://github.com/YourUsername/HDI-Predictor.git
```

- Navigate to the project folder:

```
cd HDI-Predictor
```

- Install dependencies:

```
pip install -r requirements.txt
```

- Train the model (if `model.pkl` is not available):

```
python model.py
```

- Generate analysis graphs:

```
python generate_graphs.py
```

- Run the Flask application:

```
python app.py
```

- Open the browser and visit:

```
http://127.0.0.1:5000
```

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Pair Plot generation takes slightly longer for larger datasets	Acceptable for the current dataset size.
2	Application runs on a local Flask server and is not deployed online	Can be deployed to Render or Heroku in future.
3	User authentication is not implemented.	Planned as a future enhancement.
