

Solution Architecture

Date	15 March 2026
Team ID	XXXXXX
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	5 Marks

Solution Architecture Diagram:

Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer. Fill in the specific technologies and components for your project directly into the boxes to create your architectural diagram.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
<i>[Presentation Layer]</i>	Provides a user-friendly interface for entering HDI indicators, viewing prediction results, and analyzing graphs.	HTML5, CSS3, Bootstrap
<i>[API Gateway]</i>	Handles user requests, routes pages, validates inputs, and communicates with the prediction model.	Flask
<i>[Microservices]</i>	Performs data preprocessing, loads the trained model, predicts the HDI score, classifies the result, and generates visualizations.	Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
<i>[Database]</i>	Stores the HDI dataset, trained model, and generated analysis graphs used by the application.	CSV Dataset, Pickle (.pkl), Static Images
