Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS "I want to quickly predict the HDI of a country." "I need accurate insights based on key development indicators." "I want clear visualizations to understand the factors affecting HDI." "I need a tool that is easy to use without technical complexity."	THINKS - How can I predict HDI using available data?" - Which factors contribute the most to human development?" "I need reliable and data-driven predictions." - Visual insights will help me understand trends better."
PERSONA NAME <i>(Role / User Type)</i> Data Analyst / Researcher	
DOES - Collects and analyzes socio-economic data of countries. - Inputs key indicators like life expectancy, education, and GNI per capita. - Uses ML model to predict HDI and analyze results. - Reviews visualizations and reports to make informed conclusions.	FEELS - Satisfied when predictions are accurate and insightful. - Concerned about data quality and feature impact. - Frustrated when analysis is manual and time-consuming. - Confident when the tool is easy to use and provides clear results.
